

SUBASH PARAJULI

MOBILE/WEB DEVELOPER

Bandai,Nigata,Japan | 070-8360-3458 | nicksubash9@gmail.com

INTRO

I'm genuinely excited about tech, and it's been quite a journey! I started in sales, but my curiosity led me to explore UI/UX design, and then I just had to dive into programming. Now, I'm all about Android development, but I love building web apps and even some cross-platform stuff with React Native. I've also been playing around with cloud platforms – it's just so cool to see it all come together! I'm constantly seeking new skills. At my current company, I quickly took the lead on the Android team and got some great features out the door. For me, it's all about constant growth and always learning the latest and greatest.

WORK EXPERIENCE

Egrowth Co., Ltd., Nigata,Japan

2023/8–Present

Software Developer

Android Developer

- Serve as the sole Android developer, responsible for end-to-end development and maintenance of famous Japanese Android applications.
- Collaborate with cross-functional teams to define app requirements, ensuring seamless integration with backend systems.
- Spearheaded the implementation of modern Android architecture patterns (e.g., MVVM) to improve app scalability and maintainability.
- Address and resolve complex technical challenges independently, demonstrating resourcefulness and strong problem-solving skills.
- Optimize app performance and user experience through consistent testing and updates.

QA Tester

- Worked as the Tester for the first 3 Months of joining as a fresher
- Conducted comprehensive testing of software applications to identify bugs, errors, and usability issues.
- Documented and reported test results, providing actionable insights to improve product quality.
- Collaborated with developers and product managers to ensure smooth communication and resolution of issues.
- Gained a deep understanding of software workflows, contributing to developing robust testing strategies.
